EXPERIENCE

Team Lead

Two Fish Creative, Inc.

6/2023 – Present

- Independently create/publish native iOS & Android applications & design servers & databases to integrate with
- Regularly exceed client expectations which results in contract renewals with our company at higher rates, including instances when former developers could not satisfy the client
- Introduce new developers to projects & lead the development process while utilizing scrum/agile methodologies, performing code reviews, & managing the project timeline
- Leverage TypeScript, the Vue.js Composition API, Ionic/Capacitor, Python/Flask, & MySQL/MariaDB to create full-stack platforms for clients in various industries
- Heavily use Mapbox GL JS & GeoJSON data to render maps & ChartJS to provide analytics

Software Developer

Two Fish Creative, Inc.

6/2022 – 5/2023

- Created full-stack webapps for clients related to surrogacy services & sales/marketing
- Integrated various forms of analytics into the systems & rendered data using ChartJS
- Primarily used Python/Flask alongside jQuery & MySQL/MariaDB in the stack & deployed applications to AWS to be accessed by clients' customers & employees on the web
